Transforming Lives

The University of Miami is among the top research universities and academic medical centers in the nation, and one of the largest private employers in South Florida.

With more than 16,000 faculty and staff, the University strives for excellence, and is driven by a powerful mission to transform and impact the lives of its students, patients, members of the community, and people across the globe.

The University is committed to fostering a culture of belonging, where everyone feels valued and has the opportunity to add value. Through values of Diversity, Integrity, Responsibility, Excellence, Compassion, Creativity, and Teamwork (DIRECCT) the U community works together to create an environment driven by purpose, excellence, community, and service.

The University of Miami Miller School of Medicine's Institute for Bioethics and Health Policy has for 30 years emphasized work in ethics and health information technology. It is seeking applications for an Associate Professor level position to focus on this topic.

Applicants should have an exemplary record of funded research and publications in ethics, best practices, governance or other topics in biomedical informatics or closely related fields; have experience as an instructor or curriculum developer in the areas of data science ethics or research ethics; be familiar with academic medical center operations, including electronic health records, laboratory information systems, and medical education; and have experience with or be willing to learn about hospital ethics processes and to assist in an ethics consult service.

Areas of particular interest include the development and use of artificial intelligence techniques in healthcare delivery, health-related research, and quality improvement activities; ethical issues related to the use and design of digital health applications, which could include eHealth tools such as patient portals; and the ethical, legal, and social implications of genomic medicine, including bioinformatics. The successful applicant will have an interest in public health informatics or digital epidemiology.

Though issues surrounding bias, explainability, governance, etc. of Artificial Intelligence and Machine Learning tools are receiving a great deal of attention, these issues are not new in informatics. The successful candidate will be able to think creatively about these issues as they arise in clinical practice, research, and public health.

Experience in IT fields highly relevant to empirical ethical inquiry, such as human-computer interaction, user-centered design, usability, etc., is highly desirable. Experience with Responsible Conduct of Research (RCR) programs – especially regarding data management – is desired.

A competitive salary, research and travel funds, and a range of benefits are available. Departmental appointment will depend on training and research history.

Interested applicants must apply online and should send a cover letter and CV to Prof. Kenneth W. Goodman, Director, University of Miami Institute for Bioethics and Health Policy, kgoodman@med.miami.edu, copying Ana Bezanilla, abezani@med.miami.edu.

The University of Miami offers competitive salaries and a comprehensive benefits package including medical, dental, tuition remission and more.

UHealth-University of Miami Health System, South Florida's only university-based health system, provides leading-edge patient care powered by the ground breaking research and medical education at the Miller School of Medicine. As an academic medical center, we are proud to serve South Florida, Latin America and the Caribbean. Our physicians represent more than 100 specialties and sub-specialties, and have more than one million patient encounters each year. Our tradition of excellence has earned worldwide recognition for outstanding teaching, research and patient care. We're the challenge you've been looking for.

Patient safety is a top priority. As a result, during the Influenza ("the flu") season (September through April), the University Of Miami Miller School Of Medicine requires all employees who provide ongoing services to patients, work in a location (all Hospitals and clinics) where patient care is provided, or work in patient care or clinical care areas, to have an annual influenza vaccination. Failure to meet this requirement will result in rescinding or termination of employment.

The University of Miami is an Equal Opportunity Employer - Females/Minorities/Protected Veterans/Individuals with Disabilities are encouraged to apply. Applicants and employees are protected from discrimination based on

certain categories protected by Federal law. Click [here](#) for additional information.

About Us**MIAMI**

A vibrant and diverse academic and healthcare community, the University of Miami and the University of Miami Health System have rapidly progressed to become one of the nation's top research universities and academic medical centers in

A private research university with more than 17,000 students from around the world, the University of Miami is focused on creating a future that cuts across geographic, cultural, and intellectual borders.

The University comprises 11 schools and colleges serving undergraduate and graduate students in more than 180 majors and programs. The University ranks No. 57 on U.S. News & World Report's 2020 Best Colleges list and ranked No. 49 in the 2020 Wall Street Journal/Times Higher Education College Rankings.

Established in 1925 during the region's famous real estate boom, today the University is a major research university engaged in nearly \$346 million in research and sponsored program expenditures annually. While the majority of this work is housed at the Miller School of Medicine, investigators conduct hundreds of studies in other areas, including marine science, engineering, education, and psychology.

Bascom Palmer Eye Institute is ranked the #1 eye hospital in the USA and offers some of the nation's premiere eye doctors to treat every eye condition for adults. Sylvester Comprehensive Cancer, part of the Miller School of Medicine, received the prestigious National Cancer Institute designation in 2019.

To ensure the safety of our workforce, the University of Miami / Miller School of Medicine / UHealth System requires that all faculty and staff receive influenza (flu) and COVID-19 vaccinations or request for a medical or religious exemption prior to the hire date.
